Description: Patient centered care will drive accountable care and value based reimbursement. The interoperable patient centered record, health information exchange and personal health records will be the foundation for quality measurement, outcomes improvement and cost reduction. This session is designed to inform healthcare executives regarding the strategies needed to integrate care across the continuum, the information platforms required to support new models of care delivery and the leadership approaches necessary for success.

Objectives:

- Explain the patient centered culture and its relationship to interoperable health records.
- Identify future trends electronic health records, health information exchange, and personal health records, and their connection to accountable care.
- Explain the new role of physician leaders in quality and cost management.
- Define the information platform needed to support accountable care and value based reimbursement.
- Prepare self-assessment questions for Executive Teams.

Speaker: Pam Arlotto, President and CEO of Maestro Strategies

Pam Arlotto works with CEOs, Boards and the C-Suite to create new care delivery models, design new information based governance structures and develop strategies for high value healthcare. She is President and CEO of Maestro Strategies an Atlanta based management consulting firm.

Pam's role as a national thought leader and change agent began as National President of the Healthcare Information & Management Systems Society (HIMSS). Pam is well known for the award winning book series, *Beyond Return on Investment: Expanding the Value of Healthcare Information Technology* and won the Healthcare Financial Management Helen Yerger/L.Vann Seawell "article of the year" award in 2010. She was recognized by HIMSS as one of the 50 top HIT leaders during the organization's 50 year anniversary celebration. She is a frequent key note and sought after speaker for professional associations, board retreats and healthcare industry meetings.
