

A Successful Collaboration

Amerinet Executive Resources

A Short Take on Success

The Challenge

- Retirement community requires a customized adult monitoring system that preserves resident dignity and discreetly but effectively secures second-floor supported living unit
- Cutting-edge security technologies readily available but labor-intensive and expensive

The Solution

- Amerinet Executive Resources and affiliate HRS suggest innovative RFID-based approach from leading security specialists RF Technologies
- Turnkey installation and operation possible with RF Technologies Code Alert systems
- Cost-effective purchase possible via competitive Amerinet contract pricing

The Outcome

- Savings realized in the tens of thousands
- ROI achieved as enhanced security features attract new residents

Partnership Improves Resident Safety at Supported Living Facility

activities to 24-hour-a-day nursing and dementia care. The facility was the very first retirement community to open in downtown Seattle and recently celebrated its 50 year anniversary as a model urban center recognized nationwide as a leader in creative aging. A non-profit organization, Horizon House strives to serve a diverse community by promoting an active culture focused on wellness and living.

Horizon House director of purchasing and building services Brad D'Emidio, reached out to Amerinet affiliate Health Resource Services (HRS) looking for an individualized safety solution for the residents of their second floor supported living unit. Featuring a home-like environment, tenants are encouraged to be as independent as possible. However, to ensure health, safety and continuum of care, it is essential that a security strategy be in place. With multiple stairwells and elevators accessed by the numerous clinicians, staff and loved-ones coming and going at all hours, a comprehensive yet efficient and cost-effective solution was necessary to permit freedom of movement and dependable protection.

Amerinet Executive Resources and Office Solutions collaborate with affiliate HRS and key supplier RF Technologies to improve resident safety at supported living facility in Horizon House Retirement Community.

The Challenge

Located in the heart of downtown Seattle, Horizon House is a continuing care retirement community designed to provide a full spectrum of services for residents, from complete independence to individualized care in a supported living unit. Assistance for the more than 550 seniors that call Horizon House home ranges from help with daily

The Solution

HRS representative Bill Cook describes "putting the wheels in motion," immediately contacting his regional partners at Amerinet to see if an appropriate system would be available at discounted contract pricing. Vice president of Executive Resources and Office Solutions John Vinarsky put the team in touch with RF Technologies®. "RF Technologies is a leading provider of comprehensive, integrated radio frequency identification (RFID) safety and security solutions," he explained. With more than 10,000 systems installed in healthcare facilities worldwide, Vinarsky was sure RF Technologies would be able to offer the right safety solution at a budget-conscious Amerinet contract price.

"RF Technologies provided an expert solution that saved us thousands of dollars and even helped Horizon House attract new residents!"

 Horizon House

A Successful Collaboration

Amerinet Executive Resources

RF Technologies specialist, Brandan Wolf worked with D'Emidio to help select the best product: The Code Alert® Wandering Management Solution. This unique transmitter-based technology is an easy-to-use system that provides essential security while preserving resident dignity via an innovative and attractive wristwatch-styled wireless transmitter. When the wearer approaches a guarded exit, the door automatically locks and staff is notified. In addition, Wolf was able to provide a discount on all the equipment.”

“Bill explained that Horizon House had contacted several other suppliers trying to meet this particular security need,” said Wolf. “It is safe to say they selected RF Technologies based on our affiliation with Amerinet— and because of the team effort exercised by all three companies. Each brought their individual expertise and organizational resources to the table to strategically and effectively design a solution that exactly met this customer’s objective.”

Results

Horizon House purchased the RF Technologies Code Alert Wandering Management Solution through HRS using Amerinet contract pricing. “The Code Alert System was an expert, turnkey solution. Not only were we happy with RF’s knowledge and service, by working with Amerinet and HRS, we also saved thousands of dollars,” said D’Emidio. “In fact, we have even added new residents based on this tracking feature.”

Vinarsky, Wolf and Cook each agreed that collaboration was the key factor in the successful completion of this essential project. “It’s rewarding to be part of a process that materializes the way you envision it,” said Wolf. “It really is a testament to the professionalism and hard work of the entire team, working together for the common goal of helping our customers reduce costs and improve the quality of service and care they provide to their communities.”
